

York Brazil CKD Label Requirements

May 2008

Specific Brazil part numbers are identified to ship directly to the Complete Knock Down (CKD) facility in Brazil where they are assembled into a motorcycle. The directions below pertain to orders placed by the York Brazil facility for shipments to Brazil. The Kansas City facility also orders material for Brazil and those orders will have a different schedule issuer code, ship to code, purchase order number and labeling requirements.

The York Brazil/CKD parts are ordered by the Brazil plant (EDI ship schedule will have a schedule issuer code of 7178522171) with a ship to location of the York plant (EDI ship schedule will have a ship to code of 062629324) and will have a purchase order number beginning with a B (i.e. B00000xxxx).

The York Brazil parts are cross-docked at the York plant and **require the following Brazil/CKD label attached to each box in the shipment** to ensure they get routed correctly for receipt into Brazil's inventory and placed into a sea container for shipment.

A yellow rectangular label with a black border. The text "BRAZIL/CKD" is written in large, bold, red capital letters on the top line, and "YORK" is written in large, bold, red capital letters on the bottom line.

BRAZIL/CKD
YORK

The Brazil/CKD label is mailed to the supplier with the purchase order. When additional labels are needed, please contact the York Brazil purchasing representative and he/she will ensure that additional labels are mailed to your company. Please do not reproduce the label as the H-D processes require a label matching to the exact size and color.

Requirements

- ❖ The York Brazil/CKD label (illustration on page 1) must be attached to the top of each box in the shipment and visible through the shrink wrap.
- ❖ York Brazil/CKD parts can not be combined with other shipments to Brazil or York.
- ❖ Each box must have Container labels attached. Refer to the Product Identification (B-10) Label Specification document for additional information.
- ❖ The pallet must have a Master label or Mixed Master and Mixed Load labels attached. Refer to the Product Identification (B-10) Label Specification document for additional information.

Example

Below is a Mixed Load pallet illustration. Please note each box contains the York Brazil/CKD label attached to the top of the box; Container labels on the adjacent corners of each box; Mixed Load label; and an envelope containing the Mixed Master labels. Also, all parts on the pallet are York Brazil/CKD parts and have a purchase order number beginning with a B.
